EDUCATION

Dr. Babasaheb Ambedkar Technical University, Lonere, Maharashtra

B.Tech in Artificial Intelligence and Data Science

CGPA: 7.82

Solapur, Maharashtra

Expected Graduation, Aug 2026

PROFILE SUMMARY

Targeting **Data Analyst** roles with an organization of high repute with a scope of improving knowledge and further career growth.

- Data Analyst with a strong foundation in **Statistical Analysis**, **Data Visualization**, and **Business Intelligence**.
- Proficient in **SQL** (PostgreSQL, MySQL), **Python** (Pandas, NumPy, Matplotlib, Seaborn), and **Excel** for data analysis and manipulation. Experienced in building interactive dashboards and automated reports using **Power BI** and **Tableau** to support data-driven decision-making.
- Adept at performing **Exploratory Data Analysis (EDA)**, cleaning messy datasets, and extracting actionable insights from structured and unstructured data.

PROJECTS

R.E.A.D.M.L.

Mar 2025 – June 2025

Tools: Python, Streamlit, Numpy, Scikit-learn, SpaCy, Plotly, Matplotlib, pdfplumber, python-docx, PyPDF2

READML (Resume Enhancing, Analyzing and Developing using Machine Learning) is an AI-powered resume analysis and generation tool that uses Natural Language Processing (NLP) and Machine Learning to evaluate resume content and formatting. The system extracts relevant sections such as skills, education, and experience, and analyzes them for keyword relevance, grammar accuracy, and industry alignment. Based on the analysis, it provides actionable feedback and suggestions to improve the resume's effectiveness. Additionally, it dynamically generates polished PDF resumes using HTML templates and the wkhtmltopdf engine. The project emphasizes automation, personalization, and ATS (Applicant Tracking System) compatibility to boost candidate visibility in job applications.

Responsibilities:

- Designed and developed an AI-powered resume analyzer and generator using Streamlit, OpenAI's Gemini API, and NLP techniques.
- I have followed best practices in error handling, input validation, and asynchronous request handling for stable performance.
- Implemented data visualization dashboards using Streamlit (and optionally Plotly & Matplotlib) to display:
 - Skill match percentage
 - Resume ratings
 - Key section completion scores
 - Overall resume strength

Healthcare Analysis

Jan 2025 – Feb 2025

Tools: Python, Pandas, Matplotlib, Seaborn, Power BI

It is an end-to-end interactive Healthcare Analytics Dashboard using Python and Power BI to analyze and visualize healthcare data including patient demographics, disease prevalence, gender distribution, and hospital performance. contains a comprehensive healthcare dataset analysis with 10,000 patient records spanning from October 2018 to October 2023. Enabled healthcare insights through dynamic filtering, real-time charts, and intuitive KPIs to support data-driven decision-making in the healthcare domain.

Responsibilities:

- Designed and implemented a fully interactive Power BI dashboard to visualize and monitor healthcare performance metrics.
- Developed multiple interactive visualizations (Pie, Bar, Line charts) using Matplotlib and Seaborn to explore disease types, gender ratio, and hospital performance.

- Ensured scalability and reusability of code by modularizing data loading, filtering, and visualization components.
- Applied data analysis best practice to extract actionable insights from large and structured healthcare datasets.

ACADEMIC ACHEIVEMENTS

- R.E.A.D.M.L. Secured 2nd place at the project exhibition held at our (VVPIET) college for developing the AI-powered resume analyzer and generator project “R.E.A.D.M.L.” using Streamlit and Gemini API.
- Received an official reference letter from the Head of Department, Artificial Intelligence and Data Science, VVPIET, recognizing strong academic performance, technical proficiency, and contributions to workshops, hackathons, and research initiatives.
- I am an active member of the AI&DS Nexus Council (ANC) and the Institution's Innovation Council (IIC) at VVPIET, contributing to department-level and college-wide initiatives focused on innovation, entrepreneurship, and academic excellence.

SKILLS

Programming: Python, R Language, SQL, HTML, CSS, JavaScript, C, Flutter, PHP.

Soft Skills: Analytical Problem Solving, Strong Communication, Critical Thinking, Time Management, Self-Motivation.

Library / Framework: Pandas, Numpy, Matplotlib, Seaborn, Streamlit, Scikit-Learn, OpenCV, Tailwind CSS.

Other Skills: Version Control, Dashboarding, Model Deployment, Prompt Engineering, Project Management.

Tools: VS code, Jupyter Notebook, Google Colab, Power-BI, Tableau, Excel, Git, Docker, MySQL, PostgreSQL, Streamlit.
